Resume

Excited and dependable UX Designer, with an Industrial Design background, seeking to bring the WOW factor and a smile to the user’s face. Over the last few years, I have enjoyed how Industrial Design can positively affect the way people perceive a product and how I brought that initial concept to life. Crossing over to UX is the next logical step to test and apply my creativity and design skills to continually add good design in the world.

Professional Experience

CAD DESIGNER

Pulseworks, LLC
Smyrna, GA
March 2017 – Present

- Models 3D CAD assemblies of site concepts for our simulators and their enclosures per client wants and needs.
- Manages timeline of new build production and installation to hit designated deadlines.

INDUSTRIAL DESIGNER

AT&T Digital Life
Atlanta, GA
June 2013 – December 2016

- Pioneered designs from initial sketch to manufactured prototype for home security and automation ecosystem, focusing on the user’s experience and interactions with his or her smart home.
- Collaborated with Marketing, Operations, and Product Development teams to define new features, installation methods, and interactions.

Projects

Cut n’ Run App – Mobile Haircut app designed for Android bringing the hair care specialists to the user when he or she cannot go to a salon or barber. Software used: Adobe XD, Miro, InVision.

Relaxination App – Mobile app created to locate and book relaxing places or activities when traveling to unfamiliar places based on locals’ and tourists’ recommendations. Software used: Adobe XD, Miro, InVision.

NSA Website Redesign – Government website redesign for the National Security Agency to improve the information architecture and aesthetics. Software used: Adobe XD, Miro, InVision.
